Quality, Pricing & Product News:

Asparagus: There's a split market now; CA is costlier than MX, but hands down the CA spears win for flavor & freshness. Delta grown Asparagus should hit our markets this week on large, standard & limited jumbo.

Avocados: Brokaw Hass Avocados available this week from Brokaw Farm in Ventura County. Production is limited; we'll carry a variety of sizes including 40, 48, 60 & 70 count. Shipment arrives every Wednesday.

Cauliflower: Yuma crops ending, market rising as we await more local crops to come on.

County Line Mixed Chicories: Back for a limited run due to our sunny, warm February. Also, available, Baby Mixed Chicories, packed & sold per 2lb case.

Christopher Ranch Garlic: Peeled Garlic pricing continues to rise. Domestic supplies are limited, & the outbreak in China is having a significant impact on the global Garlic market. In an effort to control the spread, the government is shutting down factories to keep people home, & much of the actual Ginger & Garlic will remain in China to fill growing domestic demand for these items medicinal properties. A similar pattern occurred during the SARs outbreak a couple years back.

Ginger: Supplies are limited. Using mostly Ecuadorian & Brazilian grown, & HI when possible. Also some Honduran grown sighted. Chinese is limited, which is affecting the domestic market. We'll also be using some Peruvian Organic.

Lemon Grass: Will be short for the next couple of weeks; very strong market!

Tender Greens Update: We've discontinued Baby Red Chard, Asian Greens, Baby Mizuna, Tat Soi & Baby Red Mustard because of low demand & short shelf life. We'll revisit reintroducing these items sometime in April. Also, supplies have tightened on Baby Arugula, Kale, Spring Mix & Spinach as weather was cool & rainy all last week in the SoCal & AZ growing regions. Prices are steady on available supplies.

Melon Update: Honeydew Melon supply improving with the warmer weather in MX. Cantaloupes are Guatemalan or Honduras grown until April. Cantaloupe prices up a little; Honeydew market steady or down this week. Seedless Watermelon supplies are very tight on a rising market. We are using 5ct size this week that average 15lbs per Melon.

Tomatoes: Growing areas in MX now producing good volume as weather warms. Supply & pricing has improved on both Romas & Red Slicers.

Veggie Update: Eggplant, MX grown Yellow Straightneck, Medium & XF Zucchini Squash supplies are very limited on a rising market this week. The rainy, cold weather a month ago is now affecting the crops. Green, Red & Yellow Bell Peppers supplies are strong on an easing market this week. 36ct & English Cucumber availability is also increasing, with prices coming off.

Good Value Items: Asparagus, Tomatoes, Artichokes 18/24ct, Red Grapes, Grapefruit, Mango, Celery, Broccoli Bunch & Crowns Cilantro & Italian Parsley
